Thai

EMPLOYMENT

14Four

Front-End Developer

Building modular front-ends for major clients using Jade, Sass, and ES2015.

2016 to Current
Spokane, USA

PTT Oil & Gas

Linguist

Translated a 400-page franchise operations manual from Thai to English.

2015 to 2016
Seattle, USA

PROJECTS

Kithub

- Rails 5 + Angular 1.5.6 + D3 v4 + RSpec + Devise + SendGrid
- Led a team of 4 developers.
- Wrote custom data visualizations in D3.js.

Oct 2016

App.ly

- Rails 4.2.6 + CSS3 + APIs (Yelp, College Scorecard, Google Maps)
- Worked as part of a 6 person team.
- Handled SendGrid, rebuilt login to use Devise and Google OAuth sign-in.

Aug 2016

TaxTurbo

- Java SE 8 + JUnit 4.12
- Desktop Java file IO with Big Decimal objects instead of doubles.
- Parses lines of text into sales tax receipts based on class inheritance, interface implementation, & product name recognition.

Nov 2016

Greybook

- Rails 4.2.6 + jQuery + ERB + RSpec + PostgreSQL + AWS
- Asynchronous data manipulation via AJAX.
- Friend other users via ActiveRecord associations and SQL joins.
- Upload photos via Paperclip and AWS.

Sep 2016

JavaScript Games

- JavaScript + jQuery + CSS3 + HTML5 Canvas
- Asteroids, Tetris, and Snake in your browser.

Sep 2016

ACTIVITIES

I build musical instruments and effects in SuperCollider, a dynamically typed, garbage-collected, single inheritance object-oriented and functional language similar to Smalltalk with a syntax similar to Lisp or C.
